ABOUT ME

I am a very restless and curious person. I love challenges and I am by nature self-taught and autonomous. However, I have an excellent management of interpersonal relationships. I love working as a team and I like to share my knowledge with the groups in which I am. Also, I am always interested in learning more to develop and grow both personally and professionally. After having started as a freelance QA and worked in several projects, today I have more than 8 years of IT experience.
